Projects

SnakeVerse

- Developed a classic Snake Game using HTML, CSS, and JavaScript, implementing core game mechanics like snake movement, food generation, score tracking, and collision detection.
- Designed an interactive user interface with real-time score, high score, timer, and game-over functionality, ensuring smooth gameplay and better user experience.
- Applied JavaScript logic and DOM manipulation to manage game states, improving problem-solving skills and understanding of game loops and event handling.

Virtual Piano Web Application

- Developed an interactive browser-based piano playable using keyboard input with real-time audio feedback
- Implemented clean UI and accurate key-to-sound mapping for smooth user interaction
- **Tech:** HTML, CSS, JavaScript

Avengers Showcase

- Built an animated showcase website featuring Marvel characters with engaging UI interactions
- Implemented modern layouts and smooth animations for an enhanced user experience
- **Tech:** HTML, CSS, JavaScript, GSAP

Work Experience

Boot & Boost Entrepreneur LLP | *Hyderabad, India* | *01-07-2025 – Current*

Project Associate (Internship)

- **Communicated directly with clients** as the main contact for projects, making sure everyone understood project needs.
- **Worked with the development team** to build responsive web pages for different clients using **HTML, CSS, JavaScript and React JS**.
- **Helped the team implement and test** new features on websites, ensuring they worked well across different browsers and devices.
- **Kept track of all client requests** and questions, answering them quickly and making sure projects stayed on track.
- **Helped run meetings** with clients and our technical team, taking notes and making sure everyone agreed on the next steps.
- **Worked with the team** to fix problems clients had and found ways for our company to do more business with them.
